Advertising media pack

INTRODUCTION

Training Ground Guru is the only UK website dedicated to the performance side of football. We are the go-to destination for all the latest information and insights into this burgeoning industry, which is already worth millions of pounds a year.

Whereas other media focuses on what happens on the pitch, we lift the lid on what goes on behind the scenes, on the training ground. This is where success is born.

Simon Austin, a former BBC Sport features editor and national newspaper journalist, set up the site in February 2017 and it has already gained a dedicated following.

“The UK is the perfect storm, where you have the money plus the knowledge. Good sports tech makes its way to the UK first.”

**LAURIE MALONE,
CEO OF VALD PERFORMANCE**

THE INDUSTRY

Football performance and sports science is a large and growing sector. Here are some key stats:

- There are 20,000 sports science graduates every year.
- Each Premier League club has dozens of first-team analysts, coaches, physios and medical staff. In addition, they are required to have several specialist staff in their Academies.
- The latest Premier League TV deal (2016 to 2019) was for £5.136bn. Even the bottom club, Sunderland, gained £99.9m in prize money in 2016/17.
- Injuries accounted for more than £131m in lost wages in the Premier League in 2016/17. This is why sports science and medicine is such a key priority for clubs.
- There are many companies within the football performance sector, both established and start-up, from the UK and overseas. Many international firms see the UK as the key market to break.

“Training Ground Guru is a great vehicle for learning about the holistic approach to coaching. It is equally valuable for teachers, coaches, players and fans. You will find pioneering ideas from various sporting disciplines there.”

ENGLAND RUGBY COACH 2007/8**
