EDUCATION

Twelve Football, 03/2025 - Current

Pro Soccermatics Course

8 weeks advanced course, divided into 3 projects with professional help from tutors.

- **Project 1:** Using WyScout data to plot two actions from a specific player during the Euros 2024. Looked into one part of Rodri's offensive contribution and one defensive metric.
- **Project 2:** Using StatsBomb data to create an "Expected Danger Model". Where I applied logistic and linear regression techniques to predict the probability of a goal from different pass metrics.
- **Project 3:** Still in progress. Working with tracking data from Real Madrid's 2024/2025 season in a group with members with different professional backgrounds. Using Streamlit to create an interactive dashboard for our outcomes.

Gothenburg University, 08/2024 - Current

Master's in Game Design & Technology

Deepening my skills in interactive systems and real-time graphics. The program combines technical development with creativity, giving me tools to design and analyze digital environments.

Mälardalens University, 08/2020 - 06/2024

Bachelor's in Computer Science

Built a solid foundation in programming, algorithms, and data structures, with a strong emphasis on problem solving and system development. The program also gave me practical experience in software development, databases, and interaction design using multiple programming languages such as Python, C, C++, C#, and HTML.
